

The exact genesis of science is unknown, its perspective that changes the face of the world in minutes and seconds is unpredictable. Manoeuvring between victories and losses, years of research and unexpected discoveries, we are part of this incredible world. It is important for us to turn matter or phenomena into miracles with the bonds of mind and wisdom and to be the creators of global science.

Join us for the Science Week events and share your research insights, practices and achievements

THEMATIC TRACS OF THE SCIENCE WEEK:

- Sustainable environment, engineering and technologies
- Business in a changing environment
- Public health and wellness
- Application of information technologies in studies and business

13 April 2022, 17 Studentu Street, Alytus
